

How much does BBB Accreditation cost?

What Texas businesses should ask before deciding

There is no single Texas price to quote here

BBB charges an annual Accreditation fee. Its standards say fees depend on several factors, including business size. The exact dues for your business should be confirmed with the local BBB before you commit.

What to have ready

Tell me your business name, city, number of employees, and whether you have multiple locations. I can review your current BBB profile, discuss eligibility and benefits, and provide the applicable current dues and payment details.

What the fee does and does not do

Dues support BBB's mission. They do not guarantee Accreditation. BBB evaluates businesses against its standards and continues to monitor Accredited Businesses.
